Summary

QA analyst with 3 years of experience testing healthcare and insurance applications. Designs manual and automated tests for member eligibility, plan selection, and coverage, and uses REST API checks and SQL to validate the data behind those workflows.

Technical Skills

Automation Playwright, Cypress, Selenium WebDriver, TypeScript, JavaScript, Java, TestNG, Maven

API and data Postman, REST APIs, JSON, SQL, Oracle SQL Developer

Testing Test design, regression, integration, end-to-end, UAT, cross-browser testing

CI and defect tracking Git, GitHub Actions, Jira, Zephyr

Professional Experience

Healthfirst | Software Test Analyst

New York, NY (Hybrid) | May 2025 – Present

- Develop and maintain Playwright and Cypress regression tests for member eligibility, plan search, and plan selection using reusable selectors and test helpers.
- Author positive, negative, and boundary test cases from eligibility rules and acceptance criteria, then use Jira and Zephyr to track defects and UAT coverage.
- Validate REST API status codes and JSON responses in Postman, and cross-check member workflow test data using SQL.
- Review GitHub Actions regression failures, clarify expected behavior with developers, and verify fixes through targeted retesting.

Humana Health Insurance | Junior QA Analyst

Hartford, CT (Remote) | Oct 2023 – Mar 2025

- Executed smoke, functional, regression, integration, and UAT checks for ZIP code search, plan comparisons, coverage information, and sign-in in QA and staging.
- Automated browser checks with Java and Selenium WebDriver, configured TestNG XML suites, and maintained manual test cases in Excel and Zephyr.
- Reconciled plan and coverage information displayed in the UI with Oracle test records using SQL Developer.
- Triaged defects in Jira, retested fixes, and ran targeted post-deployment sanity checks on core workflows.

Portfolio Test Results

Healthcare Member Portal Automation | Cypress UI and API regression suite (synthetic data).

50 tests passed in GitHub Actions, covering plan search, eligibility, enrollment, and API failure handling.

More GitHub Actions results · 19 Postman assertions passed · 9 Selenium tests passed
